Re: William W. Mavity
Deceased

Dear Madam:

At the insistent request of the widow of the above named deceased World War veteran and also other parties at interest, I am submitting additional medical data to become a part of your official records pertaining to the death of Mr. Mavity. My first report, which has been made of record in your office, did not contain the full information and was in error as to the cause of death. The facts of the death are as follows:

On July 11, 1929 I was called to his home and upon examination I could get no sound of the heart beat with a stethescope. He gasped a few times and was dead. The death undoubtedly was caused by an embolism from a rectal abscess lodged in the heart. There was history of hemorrhoids and rectal trouble existing for several years prior to his death.

Please file this for record.

Yours very truly,

C. L. Kirtley M.D.

Dear Doctor:

Idaho, as you no doubt are aware, is in the United States Death Registration Area and we are required to furnish transcripts of death certificates to the Census Bureau in Washington. When the certificates are incomplete so they are unable to compile their statistics properly, they are returned to us with the request that we secure the information desired.

We are asking for some further information on the certificate mentioned below and enclose herewith an addressed penalty envelope for which no postage is required for your convenience in returning this letter with the information desired. Kindly cooperate by giving us this information as soon as possible so we will not be bothering you by writing again in reference to this certificate.

Respectfully yours,

Special Agent, Bureau of Census.

In reference to the death certificate of:

Mrs. Emma Morgan who died Aug. 11, 1929
Cause of death given as "Paralysis of insane." "Operation on breast."

Information DESIRED in order to complete certificate.

PLEASE STATE THE CAUSE FOR THE RELIEF OF WHICH THE OPERATION WAS PERFORMED.

PLEASE ANSWER BELOW

This patient was operated before she was brought to the institution and I do not know the condition. Her mind was supposed to have been affected by the shock of the operation and from the affects of the toxic poisons in her system and possibly from drugs used during her hospitalization during her recovery from operation. Of course all these things can only be assumed as we get no information at the time of receiving these patients. The diagnosis is the best that could be made under the circumstances.

We are asking for some further information on the certificate mentioned below and enclose herewith an addressed penalty envelope for which no postage is required for your convenience in returning this letter with the information desired. Kindly cooperate by giving us this information as soon as possible so we will not be bothering you by writing again in reference to this certificate.

Respectfully yours,

C. K. Macey
